User journey by the Design Team of Accenture Interactive NL

Dain points

Difficulty
Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

Phases High-level steps your user needs to accomplish from start to finish	Installation the App	Upload the image	Analysis	Display the Output
② Steps Detailed actions your user has to perform	Open the app	Capture & upload the input image into the model	It will analyse the image & detect it in the trained model	Output information will be provided based on the analysis
3 Feelings What your user might be thinking and feeling at the moment	The Customer is excited to use the app and they adore its features and style	Does the model need to accurately recognise the images?	Determining if the training model is functioning appropriatey	Does the output match the user's anticipation?
